

Research Policy

B. K. Birla College (Autonomous) has an active research culture. College has imbibed the research activities since its inception. College believes in promoting enquiry/based education and experiential learning to create a human resource with an ability of creative, critical, and logical thinking. Social Science and Humanities research is of vital importance to the institution and researchers study the human aspects, generate important new knowledge which has a deep and intrinsic value. Similarly, the Commerce stream encourages the research in banking, finance, business policies, entrepreneurship and the latest economic policies. Hence, students are exposed to research methodology through curriculum and involvement in various research projects. The research policy is designed which aims at following objectives:

Objectives:

- Inculcate the research awareness amongst faculties and students through interaction with eminent scientist from various fields.
- Motivate newly appointed faculties to pursue doctoral and post-doctoral research.
- Encourage faculties to undertake Minor and Major research projects from various funding agencies. Emphasis is given on interdisciplinary research.
- Organization of various national and international conferences, seminars, webinars, and workshops on frontier research topics.
- Publication of research outcomes in reputed national and international journals.
- Partial financial assistance and special leave is granted to faculties to attend conferences at national and international level.
- Infrastructural development and creation of sophisticated instrument and computational facility to upgrade various research centers.
- To promote collaborative research with reputed national and international institutions.
- Encourage faculties for Patenting their research work.
- Strengthening industry and academia linkages by undertaking consultancy projects.

The research policy is implemented and updated frequently.
